

Circolo Amici dell'Opera *Galliano Masini*

In sketching the history of my association with Radio Telegraphy, I might mention that I never studied Physics or electrotechnics in the regular manner, although as a boy I was deeply interested in those subjects.

I did however attend one course of lectures on Physics under the late Professor Rosa at Livorno, and I was *the publications of that time dealing with* what I might say fairly well acquainted with scientific subject including the works of Hertz, Branly and Righi.
